# INFINITY TOKEN

01.

## VISION

To create an ecosystem where everyday people can access the wealth-building tools once reserved for banks, funds, and billionaires.

The current problem in the market is that high-income opportunities to position yourself from an insider perspective is currently locked to well-connected and seasoned crypto investors.

02.

## MISSION

Our mission is to provide predictable, compounding passive income and explosive growth opportunities through the Infinity Token ecosystem - combining stability with upside.

We bring the best of both Worlds. Rather than just providing a daily stable passive income stream, we also want you to profit from any huge upsides! You will also receive USDT rewards so we're not hugging all the upside!

03.

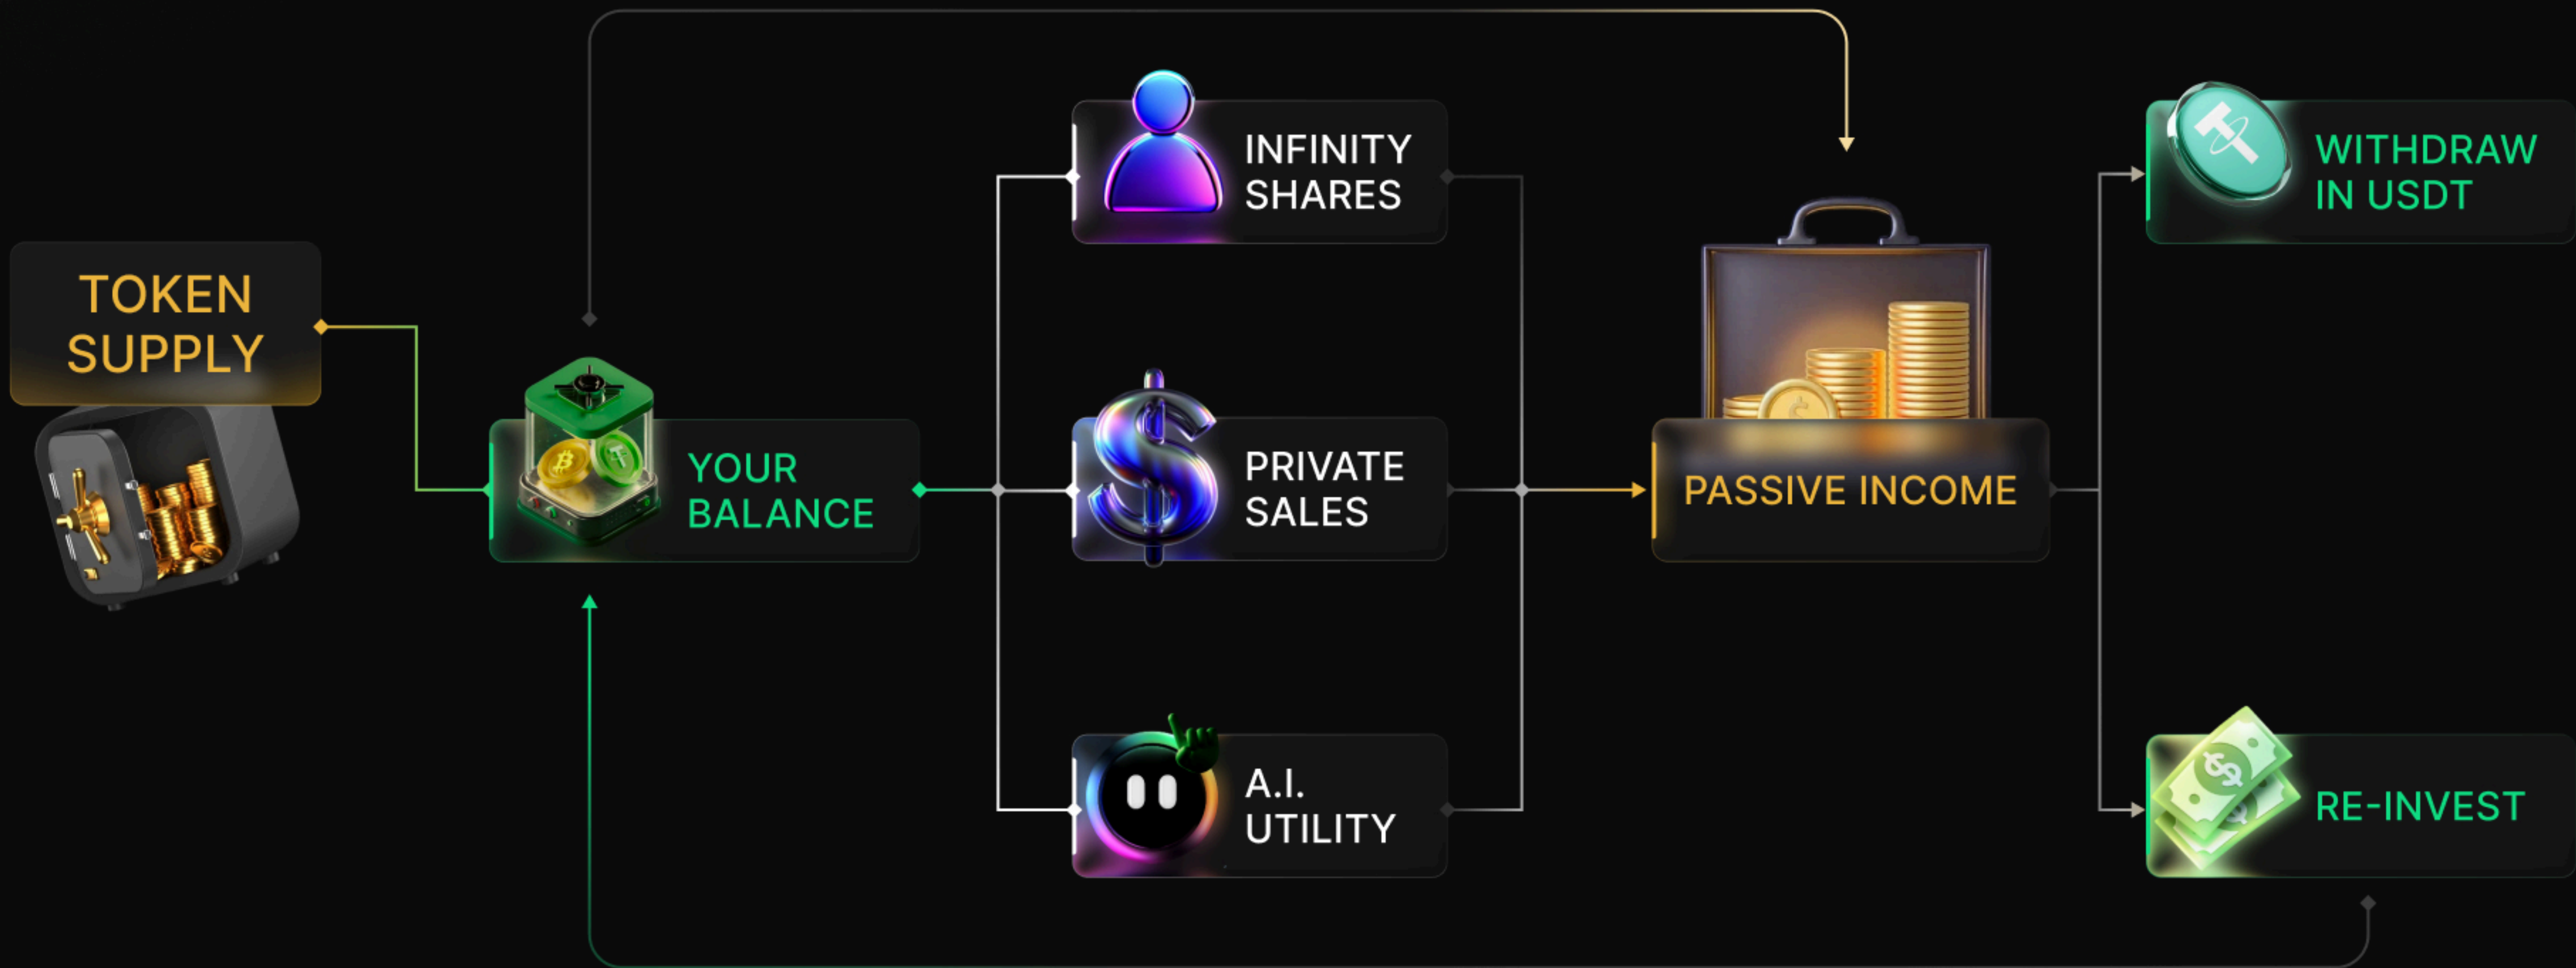

## GOAL

Our goal is to raise \$5M across 6 private sale rounds, establish 10,000+ holders in the first phase, and position Infinity Token for a 100x launch strategy.

With the current number of registrations to our limited time program which has closed now, we can already fulfil this number in the private sale and will extend at the very most to a fund of up to \$20M to cater to the ongoing demand!

# OPPORTUNITY 1

# OPPORTUNITY 1

01.

## INFINITY SHARES

You get shares in Infinity Accelerator, Infinity Accelerator+ and any other product we launch. (We have already successfully done a pre-launch of both products!)

02.

## PRIVATE SALES

We buy tokens you don't have access to that are limited in number of buyers, minimum buy-ins, and exclusivity that factors in your connections and what you bring to the table.

03.

## AI UTILITY

We invest in Crypto A.I. Utility projects, help shape and scale them, and you profit as they grow.

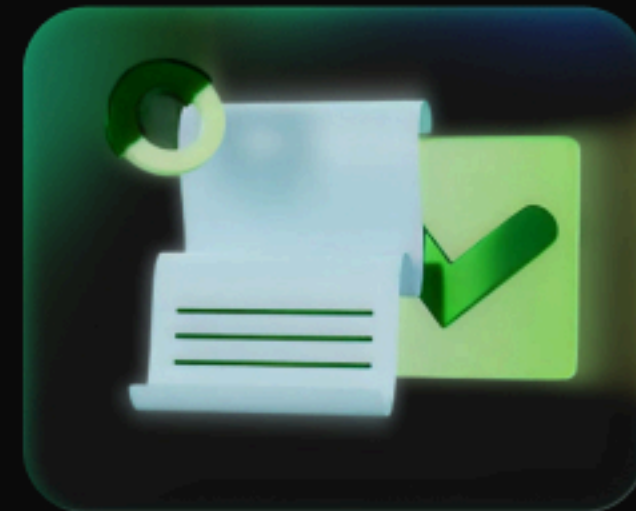

# OPPORTUNITY 2

## | Note:

There are several crucial strategies to ensure a hyper successful launch. Some of these strategies have never been done and are a NEW and proprietary method we have invented. We will explain this in a clear and methodical way for all to understand. You may then verify on ChatGPT/Google with questions you can copy/paste to them that we write for you for additional verification!

## | Foreword:

Over the past 9 Years, I have studied, noted, and printed in my office file exactly 1,093 Token Launches. There are clear patterns on the big winners, and I have compiled and readied our launch to implement the top strategies. I have also created 2 NEW proprietary systems that guarantees both a fairer and more profitable launch! I will first outline "The 100x Launch Strategy" and then outline to you the "2 NEW Proprietary Launch System"

# OPPORTUNITY 2

01.

## ATOMIC LAUNCH

Token launch, liquidity added, and 10% of tokens instantly distributed in one synchronized transaction - blocking sniper bots completely. Liquidity is locked for 6 months, meaning it can't be pulled or "rugged" by anyone, guaranteeing that the trading pool stays active, stable, and safe for all holders.

02.

## CONTROLLED RELEASE

10% of tokens are distributed instantly, followed by a 1% daily drip for 90 days. This innovative system keeps the chart climbing instead of crashing by preventing large dumps. Each daily airdrop automatically triggers burn and buy-back mechanics, creating a powerful compounding price effect. The more distributions that occur, the higher the floor rises - building stability, momentum, and consistent upward pressure.

03.

## B A S

Even  
and  
price

# OPPORTUNITY 2

03.

## BURN & AUTO-LIQUIDITY SYSTEM

Every transaction automatically burns a small portion of tokens and adds liquidity back into the pool, reducing supply, increasing price stability, and strengthening the floor with every trade.

04.

## BUYBACK & BURN VAULT

A portion of ecosystem revenue is directed into the Buyback & Burn Vault, which automatically purchases INF tokens from the open market and burns them permanently. This creates constant buy pressure, steadily reduces circulating supply, and continually raises the price floor over time - effectively turning the project itself into a long-term buyer of its own token.

05.

## B C

Whe  
x10)  
publ  
rewa  
exci

# OPPORTUNITY 2

05.

## BURN CELEBRATION

Whenever INF reaches key price milestones (for example 2x, 5x, 10x), a special celebratory burn is triggered and announced publicly. These on-chain burns remove tokens permanently, reward holders with higher token value, and spark viral community excitement with every new price achievement.

06.

## LOCKED LIQUIDITY & PRICE STABILITY

Locked Liquidity & Price Stability: At launch, liquidity is locked for six months, meaning the trading pool itself can't be removed or "rugged" by anyone, while its value naturally changes as people buy and sell. Every transaction contributes to auto-liquidity and buyback mechanisms, continually strengthening the pool and raising the price floor. This creates a self-reinforcing system where liquidity depth, stability, and security grow over time - protecting holders and supporting long-term growth.

DON'T JUST TAKE OUR WORD FOR IT!

# ASK CHATGPT THESE QUESTIONS TO VERIFY OUR LAUNCH METHOD

Just to show you how well we are crafting out the public launch of Infinity Token, there are a lot of high-level technical aspects involved that most may not understand. Simply Copy/Paste these questions into ChatGPT and it will give simple answers on how well this launch-plan really is!

 **COPY & PASTE**  
THESE QUESTIONS IN CHATGPT

### ATOMIC LAUNCH

*Would launching the Token, adding in liquidity, and distributing private sale holders with 10% token distribution all at once prevent trading bots from "sniping" the token at the beginning of the launch? Is this measure significantly safer than the usual method of launching a token first, then adding liquidity, and then distributing tokens?*

### CONTROLLED RELEASE

*For private sale buyers, would releasing the token on the launch at a 1% of tokens purchased per day avoid massive price dump, in comparison to releasing tokens in bigger batches? For example, 10% released instantly followed by 1% released every day for 90 days Vs. 10% released per month. What is the price impact on the Token if you compare this side by-side? And if releasing tokens at 1% per day is far better, why isn't anyone doing this?*

### BURN & AUTO-LIQUIDITY SYSTEM

*There is a burn and auto-liquidity system on this token. Every transaction burns 1% of the tokens and additionally adds 1% into liquidity pool. What is the price impact on the token for this compared to NOT having a burn and auto-liquidity system? Give me a simple answer as to which is best for people buying the token on the public market.*

### CONTROLLED RELEASE

*Infinity Network will use 5% of revenue generated on their products to buy INF Tokens and then burn it on a weekly basis. They will show the transaction link for this and announce it too. What is the price impact on INF Token for these Weekly burns? Will this generate more profit for INF Token holders compared to not doing this?*

DON'T JUST TAKE OUR WORD FOR IT!

# ASK CHATGPT THESE QUESTIONS TO VERIFY OUR LAUNCH METHOD

 COPY & PASTE  
THESE QUESTIONS IN CHATGPT

## BURN CELEBRATION

*Whenever INF Token reaches key milestones, there is a "burn celebration" of INF Tokens announced and made. Would this fuel greater price growth or only have a little price growth or only have a little impact?*

## LOCKED LIQUIDITY AND PRICE STABILITY

*INF Token will lock any liquidity they add into the liquidity pool for 6 Months. Is this a short amount of time or considered long term? Is locking the liquidity good for INF Token buyers or a bad thing? What does this say about the project?*

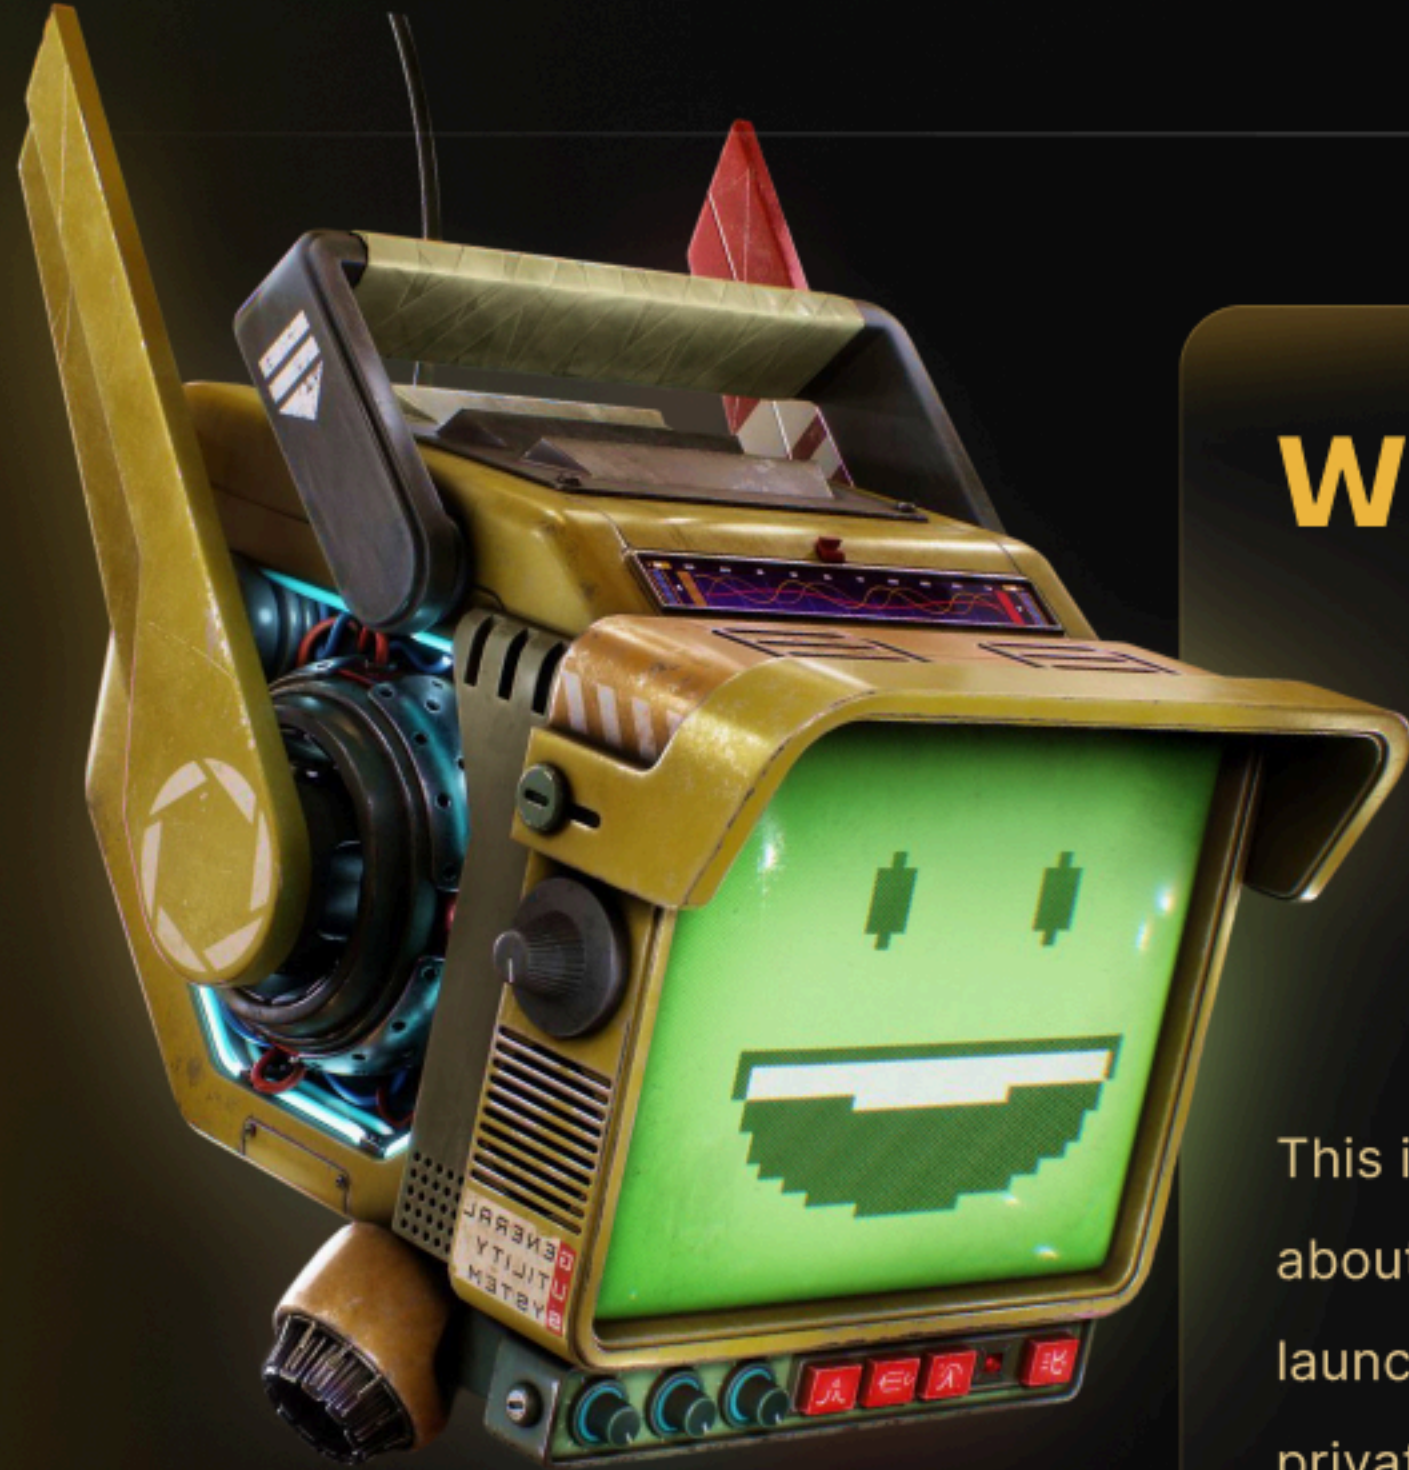

## BONUS QUESTION

*Based on all the questions and answers above, and the price of the token going up 32x during the private sale phase, is it wise to purchase INF Token during the private sale stage?*

# RISK-FREE GUARANTEE!

## WHY WE DO THIS:

This isn't just about protecting you — it's also about curating a strong, loyal community before launch. We maintain a limited number of private-sale allocations; so when someone exits, it creates space for new committed investors who truly believe in our vision. The result? A healthier, more united ecosystem and a stronger, more profitable launch for everyone involved.

## OUR PROMISE:

Every 60 days, Infinity Network opens a 24-hour Buy-Back Window where any private-sale participant can choose to sell their INF Tokens back at the exact same price they purchased them for - **no questions asked!**

## TERMS & CONDITIONS

To ensure fairness and sustainability:

- A 25% deduction is applied to account for referral commissions already paid out and any passive-income rewards withdrawn.
- You still receive 75% of your total original contribution back, guaranteed.

HOW EVERYONE ELSE DOES IT

THIS SUCKS!

TINY REVENUE GENERATED

THE PRE-2025 WAY.

TOKENOMICS ARE ANNOUNCED FIRST.
WhitePaper is created with a "plan".

THE WRONG WAY.

PRESENTATIONS MADE

PRIVATE SALE BEGINS

PRIVATE SALE ENDS (WEEKS/MONTHS LATER)

FORCED TO STICK TO TOKENOMICS ANNOUNCED EVEN though it never matches revenue and number of holders.

ROADMAP CHANGES SINCE PRIVATE SALE is always either worse or better than expected

TOKEN LAUNCHES WITH FORCED TOKENOMICS

LOCK-IN PERIOD THAT RELEASES TOKENS MONTHLY cause HUGE price corrections (usually never recovering)

FORCED TOKENOMICS FLAWS APPEAR and WhitePaper (if updated!) is completely different from the start.

POTENTIAL EARNINGS, ALTHOUGH MESSY AND RISKY.

THE 2026 INFINITY WAY.

PRIVATE SALE ANNOUNCED.
The goal is clearly set.

THE SPECIFIC WAY.

PRIVATE SALE DISCOUNTS and proprietary lock-in period announced.

PRESENTATIONS MADE

PRIVATE SALE ENDS IN 18 DAYS (not many Weeks or Months)

TAILORED TOKENOMICS ACCORDING TO REAL DATA (no guesswork!)

80% OF PRIVATE SALE BUYERS reach 100%+ in Returns.

TOKEN LAUNCHES WITH THE BEST TOKENOMICS according to private sale results.

FIRST EVER LOCK-IN PERIOD MECHANISM with no corrections on distribution!

PRIVATE SALE HOLDERS EARN BIG!

HOW WE DO IT

MASSIVE REVENUE GENERATED

# 100X LAUNCH STRATEGY (ROADMAP)

# TOKENOMICS

### DISCLAIMER:

The following tokenomics are tentative, based on a projected raise of \$5,000,000. Should the private sale surpass this target - which current momentum strongly suggests - the final tokenomics will be precisely tailored to the actual funds raised and total number of holders. Your token value remains identical, but the overall supply and price metrics will be adjusted to ensure the ecosystem launches with a perfectly balanced structure. In other words, there's no guesswork - **only precision**.

# TOKENOMICS

**AFFILIATE COMMISSIONS**

Paid instantly to the Infinity affiliate network in USDT, rewarding community growth instead of paying traditional advertising costs.

25%

**LIQUIDITY POOL AND LAUNCH STABILITY**

Added to the INF/USDT pool to strengthen the price floor, provide stable trading, and lock in confidence. Liquidity is locked for 6 months, ensuring stability and transparency for all holders.

10%

**BUYBACK & BURN VAULT**

Used for weekly buybacks and burns to raise the price floor, reduce circulating supply, and create constant upward pressure.

5%

**INVESTMENT FUND**

Used to grow ecosystem revenue through two channels: Private Sale Acquisitions (early allocations in high-growth projects) and Strategic A.I. Investments (revenue-sharing partnerships and token utilities). These are real investments generating yield and ecosystem growth.

60%

# STRUCTURE INFO

THE **PRIVATE SALE** IS DIVIDED INTO **6 ROUNDS**, EACH LASTING **3 DAYS**.

THERE ARE **5 PACKAGES** TO CHOOSE FROM, EACH WITH ITS OWN ENTRY RANGE AND CORRESPONDING **PASSIVE INCOME RATE**, WHICH BEGINS RIGHT AFTER THE **18-DAY PRIVATE SALE** CONCLUDES.

WITH EACH NEW ROUND, **BONUSES DECREASE** AND **PACKAGE PRICE RANGE INCREASE**, CREATING A CLEAR INCENTIVE TO **SECURE YOUR POSITION EARLY**.

WHILE AVAILABILITY MAY VARY BETWEEN ROUNDS, THE OVERALL STRUCTURE IS DESIGNED TO **REWARD EARLY PARTICIPANTS** AND MAINTAIN STRONG **MARKET MOMENTUM** LEADING UP TO THE LAUNCH.

THE **(+2% GLOBAL BOOST)** ON THE **DIAMOND PACKAGE** IS ONE OF THE MOST POWERFUL REWARDS IN THE ENTIRE SYSTEM.

IT ALLOCATES **2% OF THE TOTAL PASSIVE INCOME GENERATED ACROSS THE ENTIRE ECOSYSTEM** AND DISTRIBUTES IT **EXCLUSIVELY AMONG DIAMOND MEMBERS**, BASED ON EACH MEMBER'S SHARE OF THE TOTAL **DIAMOND PACKAGE VOLUME**.

THIS DOES **NOT** MEAN YOU RECEIVE **12% + 2% PER MONTH** - YOUR **12% MONTHLY RATE** REMAINS FIXED, WHILE THE **EXTRA 2%** IS A **GLOBAL POOL** THAT CAN SIGNIFICANTLY INCREASE YOUR TOTAL EARNINGS AS THE ECOSYSTEM EXPANDS.

# STARTING PRICE ON PACKAGES AND FIXED INCOME (BROKEN INTO DAILY USDT PAYOUTS)

**DIAMOND**

Buy-in:	\$50,000+

Buy-in:	\$25 - \$1,239
Bonus:	+5% Tokens
Fixed Yield:	5% Per Month
Passive income:	\$1.25 - \$62/mo

**ROUND 6**  
[ DAY 15 - 18 ]

# AS SIMPLE AS 1 - 2 - 3

01.

**PURCHASE ANY AMOUNT OF INF**

exclusively on the dashboard

02.

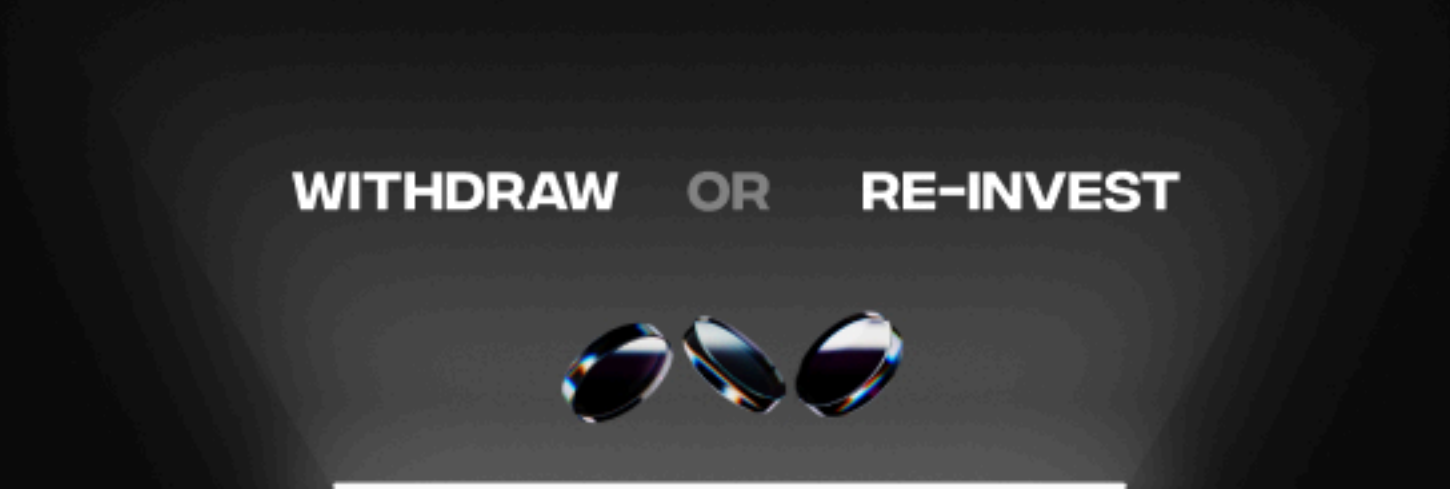

**ONCE ALL 6 ROUNDS OF PRIVATE SALE**

Is over, your daily passive income is shown on icon on menu

03.

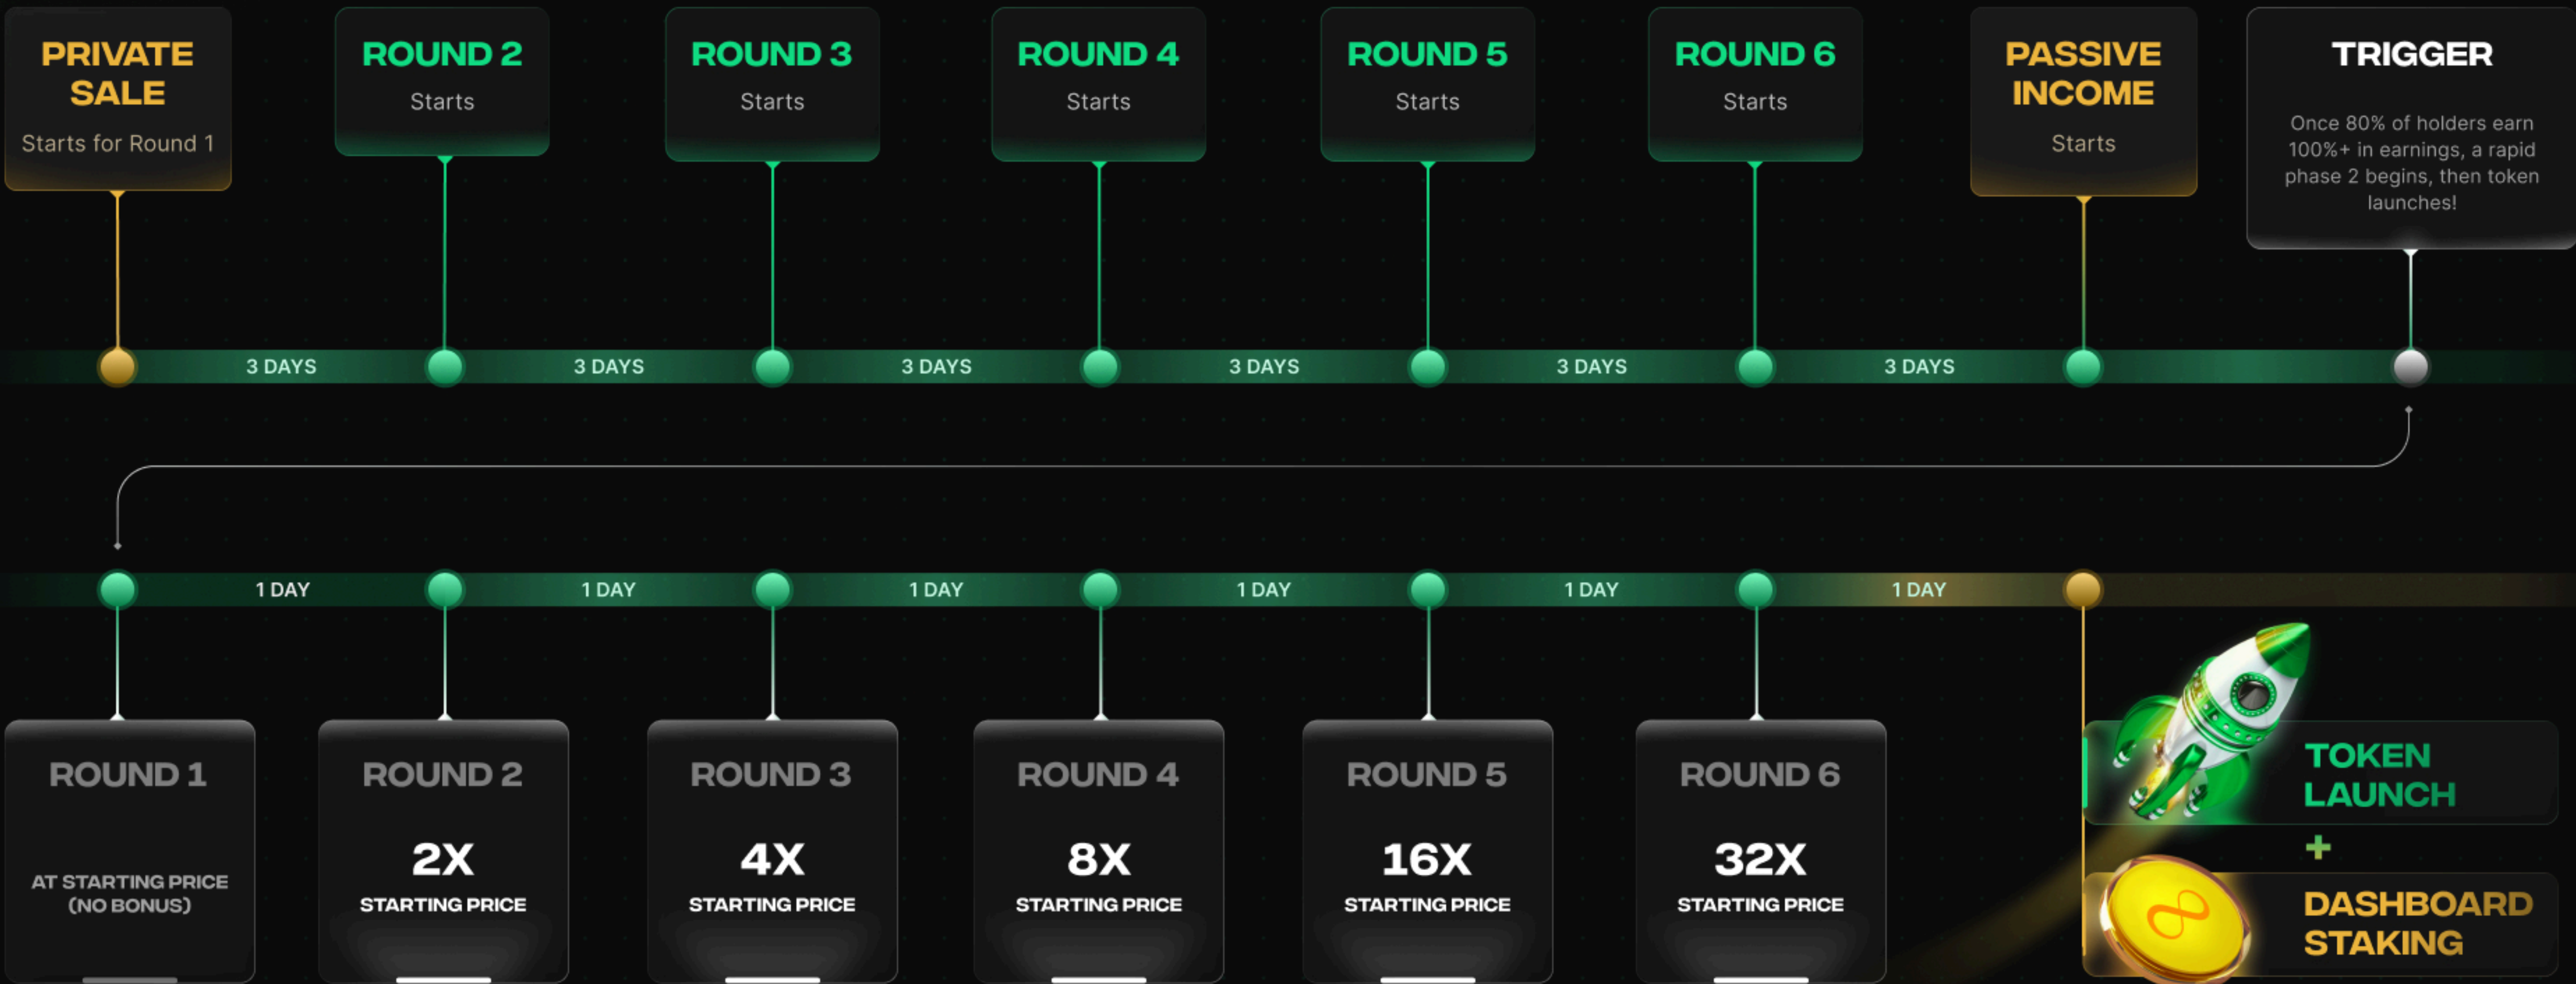

**CLICK THE WITHDRAW OR RE-INVEST**

button and enjoy your USDT or upgrade your balance

# ROADMAP

## TOKEN RELEASE SCHEDULE

At launch, **10% of tokens unlock instantly**, followed by **1% daily distributions for 90 days**.

This structure delivers your rewards fast - while keeping the chart rising steadily, not crashing.

It's a win-win; quick access, long-term growth, and built-in price stability.

01.

## DASHBOARD STAKING OPENS

[ SAME TIME AS TOKEN RELEASE ]

As token distributions begin, you can **stake your INF Tokens directly inside your dashboard** to activate **daily passive income**.

Your tokens start working for you immediately - earning yield while you sleep - all inside a sleek, automated system designed for compounding growth.

02.

## EXCHANGE LISTINGS

Once the token has matured and market stability is in place, **INF Token will begin strategic exchange listings** to expand visibility and trading volume.

We don't rush listings - we time them. Many projects lose control when exchanges take over their markets.

But with INF's **buyback-and-burn system** and **aged liquidity**, control stays where it belongs - with the community.

That means you, not the exchanges, profit as the token climbs.

03.

## CLOSING OF FURTHER DEPOSITS

[ SAME TIME AS FIRST LISTING ]

When the first major listing goes live, **dashboard deposits close permanently**, locking in exclusivity for early holders.

From that point forward, **passive income continues**, but **new members can no longer enter**.

That means more scarcity, higher demand, and greater rewards for those who were in early.

04.

# SMARTER. SAFER. DATA DRIVEN

## DRIP METHOD TOKEN DISTRIBUTION

In most private sales, tokens are released too quickly - which almost always causes **the price to crash and never recover**. On the other hand, projects that release tokens in large monthly batches (for example, 10% each month) experience sharp price drops every time tokens unlock.

After running the numbers, we discovered a smarter balance: **distributing 1% of tokens per day for 90 days**. Even if every holder sold daily, the price impact would be **minimal compared to overall market volatility**. This method delivers tokens faster while keeping the chart **stable and rising** — a simple system with an extraordinary outcome.

## TAILORED TOKENOMICS BUILT AROUND REAL NUMBERS

Think about it — whether we raise **\$5 million or \$20 million**, or have **5,000 holders or 20,000 holders**, the tokenomics should never be identical. It's like the difference between an **off-the-rack suit and a tailored one** — the fit determines the outcome.

After the **18-day Private Sale**, we'll analyze the total revenue and number of holders, then fine-tune the **starting price and total supply** to perfectly match real data. **Your total value stays exactly the same** — only the structure changes to create a stronger, more balanced launch.

For example:  
If the private sale price was initially \$0.01, but the market performs better at \$0.005, you'll simply receive **double the tokens**. Same value, but a far more powerful launch — with higher growth potential and a healthier chart.

Projects that fix their tokenomics before seeing the actual numbers are guessing

We don't guess - **we engineer**.

Tailoring the tokenomics to real results gives us a launch **that's smarter, safer, and built to multiply**.

*TWO BREAKTHROUGH SYSTEMS - THE "DRIP METHOD" AND "TAILORED TOKENOMICS" - CRAFTED TO REMOVE PRICE CRASHES ENTIRELY AND DELIVER A PRECISION-TUNED LAUNCH STRATEGY BACKED BY REAL NUMBERS.*
